

Dear Sir,

Nowadays Radio Rhino reception quality has been improved too much on 17555 kHz. Now we can hear your station more clearly & strongly. Evrynight from 1500-1530 UTC I have been listening to your English broadcast.

It is not possible for me to ring you up in your given phone no 00 49 221 9545378 because of heavy charge. Please convey my message for "Durga Puja" (Hindu's biggest religious festival) greetings to all your Hindu listeners residing all over the world through your "Listeners Corner" programme.

I am yet to receive a reply from your end. Please issue a verification letter by post for Radio Rhiono broadcast.

Regards
Swopan
